UI SCORE

UX SCORE

OVERALL SCORE

60/100

Your current user experience is likely costing you conversions. Issues related to CTA prominence and visual hierarchy can confuse users and lead to abandonment. Businesses that improve these areas often see conversion improvements of **15%–35%**.

**BIGGEST COMMERCIAL RISK**

Friction Points is limiting your conversions — scored 39/100.

Your site may be losing **45–65%** of potential conversions due to UX friction. If this is tied to a key CTA, form, or first-screen experience, it directly hurts conversion and trust.

User journey friction is causing drop-offs before visitors convert

CTA and conversion path gaps reduce the share of visitors who take action

Desktop View

Visual Hierarchy

Needs Work

Needs Work

Consistency

CONVERSION RISK

Average

Buttons are consistent in style, but some input fields vary in design.

Responsiveness

HIGH RISK

Needs Work

Mobile layout lacks some visual hierarchy, making it harder to navigate.

UX Metrics

Task Clarity

CONVERSION RISK

Average

Primary actions are not immediately obvious, which may confuse users.

Navigation Depth

CONVERSION RISK

Average

Navigation structure is predictable, but some labels could be clearer.

Friction Points

SEVERE RISK

Critical

Error states are not clearly communicated, which could frustrate users.

Accessibility

SEVERE RISK

Critical

Focus states are not clearly visible, impacting keyboard navigation.

Conversion Clarity

CONVERSION RISK

Average

Value proposition is clear, but CTAs could be more specific.

UX Score

Mobile

Compared with desktop

MOBILE DIFFERENCES FROM DESKTOP

Mobile: Reduced visual hierarchy on mobile

Mobile: CTA less prominent on mobile

Priority Stack

High Severity Issues

1. Lack of prominent CTA
2. Inconsistent spacing
3. Insufficient text contrast

Quick Wins

1. Enhance CTA visibility
2. Standardize spacing
3. Improve text contrast

Risks

1. Potential user abandonment due to confusion

Business Risk Summary

Confidence: 85%

Your current user experience is likely costing you conversions. Issues related to CTA prominence and visual hierarchy can confuse users and lead to abandonment. Businesses that improve these areas often see conversion improvements of **15%–35%**.

- 2 Standardize spacing across components
- 3 Improve text contrast for accessibility

Expert Design Review

Professional analysis from design experts

Visual Design Analysis

The visual design is clean but lacks emphasis on key actions.

Strengths

- Modern aesthetic
- Clear branding

Areas for Improvement

- Inconsistent spacing
- Weak CTA visibility

User Experience Analysis

User experience is generally intuitive but has friction points.

Strengths

- Predictable navigation
- Clear value proposition

Areas for Improvement

- Confusing primary actions
- Lack of feedback on interactions

Technical Implementation

Technical implementation is solid but could improve in responsiveness.

Strengths

- Responsive layout
- Fast loading times

Areas for Improvement

Overall Expert Verdict

The design is visually appealing but requires adjustments to enhance usability and conversion potential.

Improvement Roadmap

Prioritized by urgency and potential conversion risk.

Do this week

Delaying this can keep hurting conversion.

- Increase CTA size and contrast
- Standardize padding

Do this month

These issues compound if they stay live.

- Enhance feedback for user actions
- Improve text contrast

Plan before it becomes expensive

Leave these too long and fixes get larger.

- Conduct user testing to identify pain points

NEXT STEP

Let's fix what's costing you conversions.

With 10 metrics below target, you're likely losing 45–65% of potential conversions. In 4 days, we pinpoint the exact issues, what to change, and how to fix them — actionable work designed to unlock real results.
